

Shaftonomics is a term to describe the way people use their own version of economic principles to support their socioeconomic views. Capitalists, communists, and socialists constantly depict their views as the only means that will effectively work. History has shown that they do not meet the needs of all of the people, but they are always trying to come up with lame excuses for using their methods. This book points out the shortcomings of these systems and suggest a different method of applying economic principles that would work better for everyone.
